NEW

aerolyzer

Pioneering detection of trace contaminants by sensor technology

Powerful portable detection tool for operators and MROs

aerolyzer aims to facilitate troubleshooting procedures referring to cabin odor reports.

The device's main benefit is to support the rapid detection and discrimination of specific odor root causes. With the help of the **aerolyzer**, it is possible to shorten trouble shooting efforts, thereby reducing manpower and costs significantly.

The **aerolyzer** has been developed in a joint product development between AIRSENSE Analytics and AIRBUS and represents the most cutting edge technology in airborne trace contaminants detection.

Troubleshooting

- reduction of troubleshooting time and efforts
- reduction of maintenance time e.g. for decontamination
- reduction of maintenance costs by identifying the root

+ Important features of the aerolyzer

- Rapid detection of specific odor root causes in and around the aircraft
- Simple to read HMI design for operators
- Smart-Sensor Fusion for enhanced detection

IMS PID

60+hrs Storage of Measurements

NEW

aerolyzer

Pioneering detection of trace contaminants by sensor technology

Technical Data

Product Description

- Smart Sensor Fusion handheld detector
- Detects various oil, deicing and hydraulic fluids
- Offline Data Analysis software

- Temperature range: -30°C ... 50°C (operating), -35°C ... 70°C (storing)

- Internal Data storage 4GB, for 60+ hours of measurement storage

Power Requirements

Main power 11– 20 VDC, 8 Watt
Standard AA battery/accu NIMH
*12 pcs (5 hrs)

Communications

Computer interface USB-C and Serial RS-232

System Requirements

Operating system Windows
Software aerolyzer Software for documentation and reporting,
CSV Report and PDF report output
Offline Data System and Library management
Basic maintenance operations

1.4kg/3lbs
+ Damping 275g
+ battery 440g

Dimensions
L261 x W93/72
x H75 mm

Features	Safety Class / Standards	Warranty	Service period
USB-C Data Transfer	IP65	12 months	24 months
